

Perspex Lucian Instructions

- Carefully take off the perspex plate and remove plastic backing from the front of the perspex. Behind this, you will find the white cardboard guide. Keep to one side.
- Either cut the shape of the perspex plate onto your desired wallpaper using the paper guide or paint the paper guide. Some emulsions may require two coats. Ensure this is dry before installation.
- Insert the wallpaper or paper guide behind the perspex plate and resecure.
- We recommend cleaning the perspex plate with a soft, dry cloth. Do not use abrasive materials as these will damage the finish.
