INSTRUCTIONS

- Changing Colour Temperature - Turn the switch off and then back on rapidly to change between the three colour temperature modes.
- Adjusting Brightness - Each colour temperature mode can be dimmed. If you have a compatible dimmer switch, adjust the brightness to your preference while in any colour temperature mode.
- Memory Function -
 - 1.If the bulb has been turned off for approximately 30 seconds it will save your preferred colour temperature.
 - 2.If you change settings rapidly, the bulb will advance to the next colour temperature mode without saving the previous mode.
