

LONG AND THIN FREDRICK MIRROR MOUNTING INSTRUCTIONS

IMPORTANT

It is essential your mirror is hung on a wall of suitable load bearing capacity. Please seek advice if you are unsure about your wall. Please note there are a variety of fixings available for different wall types. Please seek advice to ensure you have the correct type for your wall. Please also ensure your intended hanging area is not situated close to electrical wiring or pipes.

HANGING INSTRUCTION WARNINGS

Do not strike the mirror glass with any hard or pointed objects.
Do not position the mirror close to excessive heat or moisture.
Do not hang the mirror in areas with risk of accidental impact.

HANGING INSTRUCTIONS

- Decide which way you would like to hang the mirror based on the backplate on the back of the mirror.
- Drill holes for the wall fixings and screws.
- Secure the wall fixings.
- Drill the wall plate into place.
- Hang the mirror backplate onto the wall plate, ensuring that the two plates are secure.

IF YOU WANT TO STAND YOUR MIRROR

If you intend to use your mirror on the floor or mantle standing, we would advise securing the top of the mirror to the wall to prevent it from tilting forward. If possible, placing the mirror on a none slip surface would also support the mirror in remaining upright.

IMPORTANT CARE IN USE

Do not use abrasive cleaning substances to clean the mirror. Clean with a dry microfibre cloth.
